LinkedIn: linkedin.com/in/siva-prasad-18b1b187

PROFESSIONAL SUMMARY

Technical Project Lead and **Certified ScrumMaster® (CSM)** with **11+ years** in the IT industry, combining deep hands-on full-stack expertise (Python, Angular, AWS, CI/CD) with proven delivery leadership: 6 years as Delivery Project Lead at Mphasis and 5 years as Scrum Master. Track record of leading 10+ member teams, improving sprint velocity by 80% and achieving 100% on-time delivery across 3 major projects.

- **AI-ready leader:** hands-on with GitHub Copilot (POC and production), Claude Code and Agentic AI to speed up development and improve code quality.
- **Fast, continuous learner:** keeps pace with the latest AI trends and adapts quickly to new tools, technologies and skills as business needs evolve.
- Strong in Agile delivery, stakeholder management, sprint planning, risk and defect management, code reviews, and Agile coaching.
- Recognised with service-line appreciation, Kudos awards and the Pinnacle Award at Mphasis for problem-solving and delivery excellence.

CERTIFICATIONS

- **Certified ScrumMaster® (CSM)** – Scrum Alliance, 2026
- **GitHub Copilot Certification** – Udemy
- **Claude Code Action** – Anthropic
- **AI Agents Fundamentals** – Hugging Face

Tools & Others: JIRA, Postman, Chrome Developer Tools, RabbitMQ, Solr, Mule, Power BI, Payment Gateways (PayU, Citrus)

Quality & Engineering: Unit Testing, Software Testing Lifecycle, Code Reviews, Performance Optimization, Troubleshooting, Security and Data Privacy

WORK EXPERIENCE

Delivery Project Lead | Mphasis Limited, Bengaluru *May 2019 – Present*

- Lead end-to-end delivery for 3 major projects with a team of 10+ members, improving sprint velocity by 80% and achieving 100% on-time delivery.
- Led requirement gathering and defined development strategy, reducing initial project planning time by 15%.
- Facilitated stakeholder refinement sessions, reducing requirement ambiguity and improving sprint planning accuracy by 20%.
- Act as Scrum Master and Agile coach, helping multiple projects streamline their development process.
- Design and develop applications using Python, Angular, Node.js and Bootstrap; own Angular version upgrades and migrations across projects.
- Conduct code reviews to ensure quality and avoid redundancy; monitor performance in testing phases and track high-severity defects to prevent system failures.
- Drive AI adoption by running a GitHub Copilot POC and using Claude Code to automate development tasks.
- Presented chaos engineering problem-solving results to the service line and client, with quantifiable performance improvements.

Project: Pharmacord Lynk, FTP, HCP, STP – Delivery Project Lead

Client: Pharmacord | **Domain:** Healthcare / Insurance | **Tech:** Angular, Python, MongoDB, MySQL, Mule, Power BI

- Healthcare product managing the complete patient lifecycle from drug registration to delivery, coordinating providers, fulfilment centres and insurance teams.

Project: Translations – Delivery Module Lead

Client: LSEG (London Stock Exchange Group) | **Domain:** Communications | **Tech:** Angular, Python, MongoDB, MySQL, AWS

- In-house Refinitiv (LSEG) platform that translates text, documents and web content for global internal business teams.

Lead Web Developer | NR Group, Bengaluru *Apr 2016 – May 2019*

Projects: Cycle.in (e-commerce) and Pureprayer (iOS/Android app) | **Tech:** Angular, Python, MongoDB, MySQL, AWS, RabbitMQ, Solr

- Built Cycle.in, an e-commerce site for pooja products, and Pureprayer, a mobile app connecting devotees with temples for information, bookings and real-time updates via a secured web panel with hashed Python APIs.
- Recognised with a good annual rating and the Monthly Summit award (individual category) for consistent delivery.

Web Developer | Fluid Again IT Solutions, Bengaluru *Dec 2015 – Apr 2016*

- Developed dynamic web applications using Angular and Python, reducing page load times by 20% for core client projects.

Web Developer | Intellect Apps, Bengaluru *Feb 2015 – Dec 2015*

- Engineered UI components and database schemas for client projects, improving data retrieval efficiency by 10%.

KEY INITIATIVES

CI/CD Pipeline Integration with Jenkins and AWS Pipelines

- Executed a POC integrating AWS Pipelines with Jenkins for application deployment.
- Automated the pipeline from development to production with continuous script execution and detailed debugging reports, improving deployment consistency.

GitHub Copilot AI-Assisted Development

- Ran a POC to evaluate and improve web application development with GitHub Copilot.
- Delivered actionable front-end optimization insights to developers, improving code quality and application efficiency.

AWARDS AND ACHIEVEMENTS

- Pinnacle Award from the Vertical Head at Mphasis for outstanding project contributions.
- Multiple Kudos awards at Mphasis for exceptional teamwork and delivery.
- Service-line appreciation for problem-solving and timely resolution of technical issues.
- Monthly Summit award (individual category) and good annual rating at NR Group.
